

Contract Research Services

Enabling scientists to do more with less...

Founded in 1996 in Cleveland, OH, Analiza, Inc. is a leading US based provider of high quality, affordable analytical services for physicochemical and ADME properties for early drug discovery markets. Adapting gold standard methods for compatibility with early drug discovery (throughput, sample requirements, turnaround time, and cost), Analiza developed the first automated, miniaturized, shake flask system for LogD in 1999. In 2005 this platform became the foundation of Analiza's current Contract Research Organization operational base. Since 2005 Analiza has provided over 150,000 solubility measurements, 45,000 LogD measurements and 2,500 pKa measurements. Analiza extends the in-house physchem and ADME profiling capabilities of small and large pharma and biotech alike. We do the grunt work when you can't.

Guarantee: Data delivered in 72 hours or less

Available Assays

Physicochemical Properties

Solubility
LogD
pKa
Chemical Stability
Accurate Mass
XRPD

ADME Properties

Microsomal Stability
CYP450 Inhibition
PAMPA
BBB Permeability

Laboratory Capabilities

6538 Ultra High Accurate-Mass LC-MS
Sciex / ABI API 4000 QTRAP LC-MS-MS
Agilent 1100 HPLC with PDA and CLND
Hamilton Star Robotic Liquid Handling
Bruker D8 Powder XRD
pKa Pro Analyzer
Automated Discovery Workstations
UV-Vis and fluorescent plate readers
